UNEARTH EXPERIENCE SETS FOOT INTO THE INDIAN LUXURY MARKET

South Africa's full-service luxury destination management company, Unearth Experience has disclosed plans to open their India Office through its India representative, One Rep Global. Unearth Experience is a full service travel company which provides unique locations, upscale accommodations and authentic travel experiences for the discerning traveller. They seamlessly arrange all ground operating services to travel advisors, tour operators and meeting and incentive groups. From private safaris in the Serengeti, golfing tours in South Africa, scaling the sand dunes of Namibia to trekking with Gorillas in Uganda, the skilled team at Unearth Experience creates memorable experiences curated specifically to each individual client.

Speaking on this partnership, Sunil Prabhakar, Vice President of One Rep Global said, "It is our responsibility to showcase the strengths, enhance the reputation and significantly grow business for Unearth Experience from India."

"The brand perfectly aligns for what we stand for - commitment to delivering an

outstanding experience to its partners. With offices in Delhi and Pune, we cover all major markets and are soon expanding into other parts of the country," he added. One Rep Global is a luxury destination management company that is looking to establish themselves in the Indian market.

"There is a growing demand for luxury experiential travel from India and this is evident from our existing Indian clientele who believe in experiencing the best. With our years of experience and connections

across Africa we are uniquely placed to showcase the very best of Africa" said Roy Loader - Managing Director, Unearth Experience.

"African experiences are riddled with hidden costs. Squeezing pennies out of paper is a thing here. As a DMC, we won't stand for it. The price we quote you is the price you sign for at the end of the day", said Karen Loader, Director Sales & Marketing, Unearth Experience.
